The organization

Development Gateway (DG) is an international nonprofit organization that increases the impact of international development activities through innovative, sustainable information management solutions, web applications, and services. DG empowers people to accelerate change and transform their societies: www.developmentgateway.org

We are a creative and dynamic group of people based throughout the globe. We value hard work, innovative thinking, and a good sense of humor.

What you get to do

- Lead software project teams through the agile implementation process, including sprint planning meetings, daily stand-ups, sprint reviews, demos, retrospectives and grooming sessions.
- Perform technical data analysis for the purpose of usage in software implementations, including import strategies, cleaning, and mapping.
- Define functional and non-functional software requirements together with the product team.
- Create technical documentation, including user and admin guides, training documentation, data dictionaries, etc.
- Conduct quality assurance, including defining testing plans, managing and executing testing processes, and triaging process execution together with the testing team.

The necessary education, skills, and experience

- Experience in a Scrum Master/Project Manager role for at least five years for a software development project (for example: Kanban, Scrum, XP, etc). Certified Scrum Master (CSM) Certification is a plus.
- Demonstrated experience of working in software projects as a team member (for example, QA, Developer, Analyst, etc)
- Bachelor's Degree (Master's degree preferred) in Computer Science, Information Technology, or a related discipline.

- Knowledge of software development processes (requirements management, configuration management, development, testing, deployment)
- Proficiency in RDBMS and NOSQL databases.
- Excellent written and verbal communication skills in English. Proficiency in French is a plus.
- Enthusiastic team player with outstanding organizational, communication, and interpersonal skills conducive to team development.
- Demonstrated leadership and mentoring experience.
